1. How to use this guide

This guide is intended for trainers, consultants and Customer Success teams who train clients on TijaraFlow. It provides ready-to-deliver programs, timed agendas, hands-on workshops, assessment materials and facilitation tips.

It pairs with the User Manual (content reference) and the API documentation (for the advanced module).

1.1 Guide structure

- Training tracks and how to pick the right format for the client.
- The detailed program of each track, minute by minute.
- A reusable catalog of hands-on workshops.
- Assessment of learning (quiz, rubric) and templates (certificate, attendance sheet).

Teaching principle

Always alternate demonstration (the trainer shows) and practice (the participant does). A concept that is not practiced is a concept forgotten.

2. Overall learning objectives

By the end of the training, the participant is able to:

- Navigate TijaraFlow and understand the role of each module.
- Connect a store and verify that synchronization works.
- Manage products, stock, orders, customers and invoices.
- Read forecasts and reports to steer the business.
- Configure the automations suited to their plan.
- Manage their subscription and settings independently.

3. Audiences and prerequisites

Audience	Profile	Prerequisites
End user	Merchant, store manager	No technical prerequisite

Audience	Profile	Prerequisites
Power user	E-commerce / operations lead	Comfortable with a spreadsheet
Admin / integrator	IT, developer, integrator	Notions of API and webhooks

Recommended group size: 4 to 8 participants per session to keep it interactive. Above 10, plan for a co-facilitator.

4. The training tracks

Three tracks are offered. They can be taken separately or chained across several sessions (multi-level).

Track	Duration	Audience	Objective
Level 1 — Discovery	Half-day (3 h 30)	End user	Be independent in daily use
Level 2 — Mastery	Full day (6 h 30)	Power user	Leverage all modules + automations
Level 3 — Advanced / Admin	Half-day (3 h 30)	Admin / integrator	Integrations, API, governance

4.1 Choosing the right format

- Client just starting, little time: Level 1 only (half-day).
- Client who wants to use everything: Level 1 + 2 over a full day (or two half-days).
- Client with a technical team / multi-store: add Level 3.

4.2 Multi-level program (across several sessions)

Session	Content	Suggested interval
Session 1	Level 1 — Discovery	Day 0
Session 2	Level 2 — Mastery	Day +7 (after real practice)
Session 3	Level 3 — Advanced / Admin	Day +14
Follow-up	30-min Q&A check-in	Day +30

5. Teaching methods

- Guided demonstration on a projected demo account.
- Immediate practice by participants on their own account (or a sandbox account).
- Workshops built on concrete cases from the client's business.
- Validation quiz and recap at the end of each half-day.

The 70/20/10 rule

Aim for about 70% practice, 20% discussion and 10% theory. The trainer talks little and has people do a lot.

6. Preparing the session

6.1 Logistics

- Room with a projector or screen sharing (remote training possible).
- One computer per participant with Internet access.
- Training account credentials prepared in advance.

6.2 Demo accounts and data

- Prepare a demo account with a few products, orders and a fictional customer.
- For Level 3, provide a test store (WooCommerce or Shopify) and a dedicated API key.

6.3 Trainer preparation checklist

To verify	Done?
Training accounts created and tested	☐
Demo data in place	☐
Projector / screen sharing working	☐
Materials handed out (manual, workshop sheets)	☐
Quiz and attendance sheet printed	☐

7. Program — Level 1: Discovery (half-day)

Duration: 3 h 30, breaks included. Objective: make the participant independent in daily use.

Time	Module	Format
0:00 – 0:15	Welcome, round table, objectives	Discussion
0:15 – 0:45	M1.1 Interface and navigation	Demo + practice
0:45 – 1:15	M1.2 Connect your store and verify sync	Demo + practice
1:15 – 1:30	Break	—
1:30 – 2:10	M1.3 Products and stock	Demo + workshop
2:10 – 2:45	M1.4 Orders and customers	Demo + workshop
2:45 – 3:10	M1.5 Invoices and notifications	Demo
3:10 – 3:30	Validation quiz + questions	Assessment

7.1 Module M1.1 — Interface and navigation

Objective: know how to get around and reach each module.

- Content: dashboard, side menu, search, light/dark mode.
- Demonstration: screen-by-screen tour.
- Exercise: find three screens requested by the trainer.

7.2 Module M1.2 — Connect your store

Objective: perform the connection and confirm synchronization.

- Content: generate an API key, copy the webhook URL, enable events, synchronization log.
- Exercise: create an API key and locate the webhook URL in Integrations.

7.3 Module M1.3 — Products and stock

- Content: list, add, edit, CSV import, alert threshold, statuses.
- Workshop: add a product, change its stock, observe the generated stock movement.

7.4 Module M1.4 — Orders and customers

- Content: create an order, statuses, stock decrement, customer record.
- Workshop: create an order end to end and verify the impact on stock.

7.5 Module M1.5 — Invoices and notifications

- Content: invoice life cycle, PDF export, notification e-mail.

7.6 Expected outcomes after Level 1

- The participant navigates alone and knows the role of each module.
- They can add/edit a product and create an order.
- They know where to verify their store synchronization.

8. Program — Level 2: Mastery (full day)

Duration: 6 h 30. Objective: leverage all modules, including forecasts, reports and automations.

Time	Module	Format
0:00 – 0:15	Level 1 recap, objectives of the day	Discussion
0:15 – 1:00	M2.1 Stock forecasts and reordering	Demo + workshop
1:00 – 1:45	M2.2 Reports and exports	Demo + workshop
1:45 – 2:00	Break	—
2:00 – 2:50	M2.3 Automations (by plan)	Demo + workshop
2:50 – 3:30	M2.4 Stock movements and best practices	Workshop
3:30 – 4:30	Lunch	—
4:30 – 5:20	M2.5 Business scenarios (promo, return, month-end)	Workshops
5:20 – 6:00	M2.6 Subscription, limits and settings	Demo
6:00 – 6:30	Mastery quiz + recap	Assessment

8.1 M2.1 — Forecasts and reordering

- Content: velocity, days of cover, statuses, suggested quantities.
- Workshop: identify critical products and prepare a mock supplier order.

8.2 M2.2 — Reports and exports

- Content: period, revenue, top products, top customers, stock value, CSV exports.
- Workshop: export revenue and top products over 30 days.

8.3 M2.3 — Automations

- Content: auto-invoicing, stock alerts, reminders, weekly report; plan conditions.
- Workshop: enable an automation and describe its trigger.

8.4 M2.4 — Stock movements and best practices

- Content: read the log, understand the reasons; consistent SKUs, realistic thresholds.

8.5 M2.5 — Business scenarios

- Workshop A: run a promotion via a CSV price import.
- Workshop B: process a return / cancellation and verify the restock.
- Workshop C: prepare month-end exports for accounting.

8.6 M2.6 — Subscription and settings

- Content: plans and limits, usage meters, notification e-mail, API keys.

9. Program — Level 3: Advanced / Admin (half-day)

Duration: 3 h 30. Audience: admins, integrators, technical teams. Objective: master integrations, the API and access governance.

Time	Module	Format
0:00 – 0:15	Objectives, client technical context	Discussion
0:15 – 1:00	M3.1 Synchronization in depth (webhooks, signature)	Demo
1:00 – 1:45	M3.2 The public API: authentication and endpoints	Demo + practice
1:45 – 2:00	Break	—
2:00 – 2:40	M3.3 Multi-store and key governance	Demo
2:40 – 3:10	M3.4 Observability, log and troubleshooting	Workshop
3:10 – 3:30	Technical quiz + questions	Assessment

9.1 M3.1 — Synchronization in depth

- Content: supported events, sync direction, HMAC signature, rate limits.

9.2 M3.2 — The public API

- Content: Bearer key, products/orders/customers/forecasts endpoints, error codes, Business-only access.
- Practice: list products via the API using a request tool.

9.3 M3.3 — Multi-store and governance

- Content: connect several stores (Business), one API key per use, rotation and revocation.

9.4 M3.4 — Observability and troubleshooting

- Content: synchronization log, error statuses, diagnostic approach.
- Workshop: diagnose a missing event from the log.

10. Hands-on workshop catalog

Each workshop states the objective, duration, steps and success criterion. Reuse them based on the group profile.

Workshop 1 — My first product

- Duration: 10 min. Objective: create and find a product.
- Success: the product appears in the list with the right stock status.

Workshop 2 — My first order

- Duration: 15 min. Objective: create an order and observe the stock decrement.
- Success: the product stock decreased by the ordered quantity.

Workshop 3 — Read my forecasts

- Duration: 15 min. Objective: spot a “critical” product and note the suggested quantity.

Workshop 4 — Export a report

- Duration: 10 min. Objective: export 30-day revenue as CSV.

Workshop 5 — Enable an automation

- Duration: 10 min. Objective: enable automatic invoicing (Pro plan).

Workshop 6 — Diagnose a sync (Level 3)

- Duration: 20 min. Objective: find an event in the log and explain an error status.

11. Assessment of learning

11.1 Level 1 quiz (excerpt)

1. Where do you verify the store is connected? (Answer: Integrations module → connection status / log.)
2. What happens to stock when an order is created? (Answer: it is decremented automatically.)
3. Which order status triggers automatic invoicing? (Answer: “Delivered”.)
4. Where do you set the e-mail that receives notifications? (Answer: Settings → Notifications.)

11.2 Level 2 quiz (excerpt)

5. What does the “critical” forecast status mean? (Answer: imminent stockout, reorder first.)
6. From which plan are automations available? (Answer: Pro.)
7. How do you update prices for several products at once? (Answer: CSV import.)

11.3 Level 3 quiz (excerpt)

8. Which plan unlocks the public API? (Answer: Business.)
9. What is the webhook secret for? (Answer: verify the authenticity of received messages.)

11.4 Skills assessment rubric

Skill	Not yet	In progress	Achieved
Navigation and orientation	☐	☐	☐
Product / stock management	☐	☐	☐
Orders and customers	☐	☐	☐
Forecasts and reports	☐	☐	☐
Automations	☐	☐	☐
Integrations / API (L3)	☐	☐	☐

12. Facilitation tips

- Start with a round table: gather expectations and tailor examples to participants' business.
- Respect the timing: keep an eye on the clock and protect the breaks.
- Have people practice immediately after each demonstration.
- Rephrase questions aloud so the whole group benefits.
- End each half-day with a recap and the quiz.

12.1 Frequently asked participant questions

“Will my store data be modified?”

No: synchronization flows from the store to TijaraFlow; your store data is not modified.

“What happens if I reach my plan limit?”

Creation is blocked beyond the limit; you need to upgrade. Usage is visible in Billing.

“Can I connect several stores?”

Yes, with the Business plan (multi-store).

13. Appendix A — Sample schedules

Half-day (Level 1)

- Morning 9:00–12:30 or afternoon 14:00–17:30, with a 15-min break.

Full day (Levels 1 + 2)

- 9:00–12:30 (Level 1), lunch, 13:30–17:00 (Level 2).

Multi-level

- Three spaced sessions (Day 0, +7, +14) + a 30-min follow-up at Day +30.

14. Appendix B — Training certificate template

I, the undersigned _____, trainer, certify that:

Participant: _____ Company:

attended the TijaraFlow training — Track: ☐ Discovery ☐ Mastery ☐ Advanced / Admin

Date(s): _____ Duration: _____

Skills validated (see attached assessment rubric).

Done at _____, on _____ Signature:

15. Appendix C — Attendance sheet

Full name	Company	Morning signature	Afternoon signature

Trainer: _____ Date: _____ Location: _____
